NOTICE TO ALL CDS HOMEOWNERS

The CDS Board has come to a Scope of Work agreement with Vyve Broadband for the installation of internet with an Enhanced Basic TV package (It sounds more impressive than it is!)

Installation of the modems plus signal testing will commence on the property Monday April 11 and continue until all buildings are completed-estimated to be by the end of April. At the point of completion, we will terminate our service with Ting and our service with Vyve will be activated.

We may experience a day or 2 without service as this transition takes place. We hope not, but want everyone to be notified of the possibility.

The installation schedule provided by Vyve is below. Everyone will be given notice the day before we are going to enter your unit for the installation. It would be helpful if the homeowner or renter is home, but it is not required. If the homeowner/renter is not available on site, an employee of CDS or a volunteer owner or board member will accompany the workmen while they are inside the units. (If there are any owners on the property or in the area during this time who would like to volunteer to help Scott with this project, your stepping up would be appreciated and helpful.)

A notice will be placed on the doors of each unit the day before the installation for that unit is scheduled. If you have renters in your unit please forward this letter to them.

Here is the schedule of installs:

Projected Project Schedule:

Building I –Complete

Building H, G, F 4/11 to 4/15 Board Initials _____ Date _____

Building E, D, C 4/18 to 4/22 Board Initials _____ Date _____
